Cycling Class Descriptions

General Cycling Overview	Indoor cycling integrates motivating music, mind-body synergy and unparalleled training benefits. Stationary bicycles are used to simulate the effects of inertia and momentum. Whether you're a beginner or an experienced cyclist, bikes can be adjusted to meet your individual ability or physical need. Your instructor will lead you through different styles of rides focused on endurance, strength, intervals, high intensity and recovery. A total-body workout to burn calories, strengthen your cardiovascular system and increase muscular endurance. Recommended equipment: cycling/tennis shoes, padded shorts, water bottle.
Intermediate to Advanced Level Classes	Classes are not exclusive to the experienced rider, as they can be self-regulated and the bikes adjusted to meet the individual ability of the novice or beginner.
Cardio 20/20/20 (all levels)	This class includes three 20 minute intervals including cycling, circuit training and core training. This is a workout to produce total body results.
Cycle & Circuit (all levels)	Cardio and strength come together when simulating an outdoor ride with sprints, hill climbs and other terrain, the class ends with a variety of circuit exercises on gym floor.
Cycling Interval	Combines short, high intensity burst of speed, with slow recovery phases. This is repeated several times with variations throughout the class.
Cycle Pump (intermediate to advanced)	Start this ride with fast paced cycle intervals, then move on to the finish line with a challenging array of resistance training exercises.
Cycle Pump & Core	Start with 45 minute ride with fast paced cycle intervals, then move on to 45 minutes of a challenging array of resistance training exercises. Do one or both.
Griz Spin (intermediate to advanced)	This one is the instructor's choice. Burn calories while improving cardiovascular endurance and muscular strength.
LES MILLS SPRINT®	A 30 minute high intensity interval training (HIIT) workout using an indoor bike to achieve fast results. Features bursts of intensity where you work hard as possible, followed by periods of rest that prepare you for your next effort. The short duration will motivate you to push your physical and mental limits. A quick and hard style of training that returns rapid results with minimum joint impact that will smash your fitness goals and burn calories for hours after each workout.
Road Profiles (all levels)	Come ride it or race it! This class offers a variety of video outdoor road profiles with emphasis on proper riding techniques to improve your outside ride in the off season. 2 water bottles recommended.
Senior Cycle	30 minutes of cycling cardio at a low-moderate intensity. Please bring a water bottle.
Tri Training (all levels)	Work on your speed, form and endurance with certified triathlon instructor, Rob. Start in the pool, transition to cycling, finish with a run. Come to one, two or all three.
