Functional Training

Exercises that train your muscles to work together by simulating movements in daily life, activities and sports.

TRX Training

Circuit training allows you to move through a variety of strength and cardio stations utilizing battle ropes, row machines, assault bikes, the sled, many other pieces of equipment, and of course, TRX!

Functional Strength and Conditioning

Functional Strength and Conditioning with Alec is a full-body workout designed to improve your ability to function in everyday life. Come learn movements and techniques designed to promote training in a safe and sustainable manner, while minimizing injury risk. Want to work towards being a stronger, more resilient version of your best self? Come join Functional Strength and Conditioning with Alec!

Morning Mobility

Expect to engage in activities such as hip openers, spine twists, and shoulder mobility drills. The class will conclude with calming stretches and deep breathing exercises to promote relaxation and mindfulness.

Longevity

Longevity Training is designed to help you move better, feel stronger, and stay active for life. This class focuses on functional strength, mobility, balance, joint stability, and cardiovascular health to support long-term performance and injury prevention. Train with intention so you can keep doing the activities you love—now and for years to come.

PEAK Hybrid Training

Step into Hybrid Conditioning—a performance-driven class that blends endurance, strength, and functional athleticism into one powerful training session. Designed around the principles of hybrid racing, this class pairs run intervals with full-body functional stations to sharpen your engine, build resilience, and elevate overall athletic capacity.
